

# Lessons in Elementary Mechanics Introductory to the Study of Physical Science

By Philip Magnus

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 66 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1876 Excerpt: . . .  $P \times$  circumference of circle described by A B. During the same time, the screw will have moved in the direction of its axis through a distance equal to the distance between two threads of the screw, and this is the direction in which the resistance is encountered. Hence the work done against the resistance  $W$  is  $W \times$  distance between the threads. If  $C$  be the circumference described by the extremity of  $P$ 's arm and  $d$  be the distance between two adjoining threads, and if  $P$  and  $W$  be respectively the force applied and the pressure produced,  $P \times CW$  is the work done, or  $I \cdot P \times a$ . EXERCISES. 1. What weight can be supported on a plane by a horizontal force of 10 ozs. , if the ratio of height to the base is 2. With a force of 3 ozs. acting parallel to the plane, what...
