RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 36 pages. Original publisher: Washington, D. C. : United States Environmental Protection Agency, Office of Water, 2001 OCLC Number: (OCoLC)61680575 Subject: Drinking water -- Purification -- United States. Excerpt: . . . Guidance Notes for Recommended Weekly Operational Duties Inspect chlorine and fluoride testing equipment. Testing equipment is essential for a comprehensive monitoring program and must be kept in proper working order. Make sure you are using the correct chemical reagents for each type of application. Reagents should be safely stored and clearly marked with the name and date of preparation. Manufacturer-prepared reagents should be discarded when the expiration date is reached. A chemical equipment weekly testing log card is provided. Clean pump house and grounds. Keeping your pump house and grounds clean will help with overall maintenance and operation of your system. The useful life of bearings can be reduced if dirt gets into lubricants. Also, dirt and moisture will form an insulating coating on motor windings and can cause motors to burn out. In addition to cleaning, screen all drain and vent openings in the building to prevent entry by animals and insects, and in the...
